DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 to 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hart et al (US 6,618,881). Hart et al shows a bed covering that comprises multiple layers 12, 18, 22, 26, and 24 of insulating material joined into a single covering 10. Layer 26 is defined as being formed from down (column 5, line 42) and is placed next to a top comforter layer 22 and bottom comforter layer 24. The bottom comforter layer 24 can be made from insulative materials as specified in column 2, lines 16 and 17, note also that the same materials are specified to form the top quilt layer 12 (column 4, lines 14 to 20). Any insulating materials such as the ones specified in the Hart et al patent are inherently capable of having temperature regulating properties. The bed covering shown by Hart contains all of the structural details positively claimed, and is inherently capable of being used as a pillow (claim 8) or a mattress (claim 9).

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bryant et al, Colvin et al, Salyer, Shang, Buckley, Lachenbruch et al, and Augustine et al show body supports and covers that include phase change materials which are of particular interest.
